Problem-solving junior software engineer with 3+ year of experience, and a track record of meaningful contributions in Javascript to 6 large-scale commercial projects. Consistently and efficiently support a team of 12 senior engineers, mainly focusing on testing, bugs, vulnerabilities, writing reusable codes and components and updating. Looking to leverage gained experience in a more senior role with more demanding challenges at your organization. I also have experience in data management.

Work Experience**Intern Frontend Software Engineer**

Paramount Students, Istanbul, Turkey.

April 2023—Present

- Collaborated with a team of 12 software and hardware engineers to optimize the design and ensure functionality.
- Supported software testing at the operating system level and submitted 120+ reports on updates and bug fixes.
- Contributed to development of 6 commercial software projects, using Javascript, React and Nodejs(expressJs).
- Found 4 security vulnerabilities within the first two months of work.
- Participated in project usability testing every 2 weeks.

Junior Software Engineer

The Bulb Africa, Jibowu, Yaba, Lagos State.

August 2021—Till date.

- Assisted 15 senior software engineers in building and deploying e-commerce, fintech, school management, customer relation management(CRM) web applications.
- Analyzed users' needs and came up with design software solutions.
- Provided support, enhancement and maintenance to new and existing projects.
- Employed best coding practices and object-oriented programming techniques such as abstraction and association to work on full-stack software development projects
- Worked as part of a 5-member team to release and update 20+ custom javascript service oriented applications for company clients in health, e-commerce and insurance niches.
- Decreased software testing time by 15% by developing automated test scripts to alleviate bottleneck caused by large volume of tests.
- Created, tested and deployed applications on custom hardware

- Reduced loading time by 80% by refactoring student library website's legacy Javascript codebase.

ADDITIONAL SKILLS

- Data structures, Typescript, Agile, React Native, Redux, Cypress, Jest, Git, Material ui, Tailwindcss, sass, less,
- No/Low codes platforms- Goodbaber(Android, ios and web applications), webflow, fluxBuilder, Flutterflow(Mobile applications)
